

Design Thinking Project Guide 2

Design Thinkers: Brandon Verbick, Landon Pugh, Olga Hamilton

1. Creative Challenge: Topic (For example, we want to help Vegetarians because...)

We believe that young adults are challenged with in-person interactions and that they are too reliant on technology and social media for communication, leading to loneliness and overreliance on technology. We want to solve this by asking BAU students about their current confidence in their communication skills and figure out what may improve these skills and what caused their level of confidence.

These issues are:

- discomfort with face-to-face interaction
- misinterpreting tone
- misunderstandings
- reduce collaboration between others
- difficulty building professional relationships.

2. Questions (empathy map) (at least 10 questions)

1. On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.
2. Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?
3. What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?
4. Do you tend to intentionally avoid in-person interactions by using technology or social media instead?
5. Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.
6. What type of activities or support do you think would help improve your in-person communication skills?
7. What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?
8. In your opinion, how can your University create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?
9. Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.
10. What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?
11. What is your preferred method of communication?
12. How confident do you feel when communicating

3. Interview 12 strangers

Participant 1

Name: **NURIA**

Age: **20**

Gender: **Female**

Time of interview: **4:00**

Questions/Answers:

1. On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

7, Depending on the languages I'm speaking (3) , I prefer catalan to Spanish, comfortable in English because of the culture. prefer to write whatsapp with family and friends

2. Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Sometimes Chatting with friends from a distance is easy with emoji because of the impact of long distance.

3. What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

When you don't know what the other person is expecting or to please them, environment people you never meet

4. Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Yes, in some situations like skeping people I don't wanna talk with

5. Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

No, not really

6. What type of activities or support do you think would help improve your in-person communication skills?

I had a course public speaking that helped me to learn about interaction

7. What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Mother influences in public speaking, consider myself introverts

8. In your opinion, how can your University create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?
-
9. Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it is import to have communication skills for life, job, and everything

10. What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Approche people who have the same interest with you, it necessary

11. What is your preferred method of communication?

Message, email

12. How confident do you feel when communicating?

Really confident

Emotions (perceived)

- NURIA feels open for communication, speaks 3 languages and decides to use the languages she is more familiar with depending on the situation.

Insights

- She acknowledges the impact of communication, challenges about interaction expectations, and hard to navigate interaction when she's unsure how to please others.
- Nuria appears self-aware, reflective, and open. She balances her introverted tendencies with a willingness to improve her communication and adapt across cultures and languages.

Participant 2

Name: Matteo

Age: 21

Gender: Male

Time of interview: 4:30

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

7, Not a challenge.

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Not in my case, because facial expression make it easy

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

First impression

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

No

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

No

- What type of activities (or support) do you think would help improve your in-person communication skills?

Sport good way to make interaction

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

University, course and classmates

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

In group work,

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it become easy to interact

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Not fear to approach others

- What is your preferred method of communication?

Face to face

- How confident do you feel when communicating?

8, more confident (from introvert to extrovert)

Emotions (perceived)

- Mateo is confident in his communication skills and because he played soccer and being in school influence his interaction daily

Insights

- He understands the importance of communication and used to communicate in a soccer team, he responded bravely and was more confident.
- The main discomfort he experiences in new settings is the pressure of first impressions.

Participant 3

Name: **Andre**

Age: **25**

Gender: **Male**

Time of interview: **5:45**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

7, First I try to find the oei to oei connection, communication very important in my design course and work

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Yes, I'm addicted to twitter (for distraction) is difficult to pay attention and do multitasking

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

When I don't know the person I try to be polite, give myself impression, not rely in my body (hand)

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Never used

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

No

- What type of activities or support do you think would help improve your in-person communication skills?

Disconnect with phone

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Family first, school, being around people you know to build the skills

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Requesting group activity to make small connection

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

For sure, in a way I can be more confident to present in conferences, and at work.

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Understanding that it is different way to present yourself in media and in face to face

- What is your preferred method of communication?

WhatsApp chat emoji

- How confident do you feel when communicating?

7-8, I can defend myself and manage what to say.

Emotions (perceived)

- Andre is more confident in his communication skills because he understands what to do for the first time and practice it regularly in his work (Graphics)

Insights

- Andre is more confident in his communication style, knows techniques (oei to oei) on how to approach people, connection and values communication highly in his design work.
- He believes that disconnecting from the phone and being around familiar people helps improve in-person communication. His communication skills were shaped by family, school, and consistent exposure to real-world interaction.

Participant 4

Name: Meilin

Age: 22

Gender: Female

Time of interview: 6:35

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

6, I don't know how to approach to people, I'm shy

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

No, Because it is another way to communicate

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

Not feel comfortable talking to stranger people, less comfortable with

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Yes

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

No

- What type of activities or support do you think would help improve your in-person communication skills?

More exposure to new people

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Peers experiences

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Motivation Activity for interaction

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it can improve social life and career

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Be aware that social media is not the only way we're going to communicate

- What is your preferred method of communication?

Social media

- How confident do you feel when communicating?

8

Emotions (perceived)

- Meilin is shy and not confident to approach strangers and suggests more activities that involve interaction to improve her communication skills.

Insights

- Meilin is self-reflective and reserved, but she demonstrates awareness of her social challenges and is open to strategies for growth.

Participant 5

Name: **Carla**

Age: **20**

Gender: **Female**

Time of interview: **4:47 pm**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

She rates herself on an 8 out of 10, because she thinks she is better at talking to people in person than most people she knows.

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

She does frequently use social media, and thinks it affects her and others' ability to interact with each other.

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

She thinks that it can be awkward sometimes to find things to talk about.

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Not usually, but there are some confrontational situations where she wants to do this because it is awkward in person.

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

Sometimes she feels lonely when people are not responding to her texts and social media posts.

- What type of activities or support do you think would help improve your in-person communication skills?

Being forced to interact with people, although awkward, could be helpful.

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

School exercises and group projects feel important to her confidence level.

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Having mandatory assignments or activities that require face-to-face only interactions.

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

She does think they would help, because they are important for all aspects of life.

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Utilize social media for communication less than they normally do, and try to ask people about anything to break the ice.

- What is your preferred method of communication?

Snapchat.

- How confident do you feel when communicating?

Pretty confident, better than most people her age.

Emotions (perceived)

- She feels generally happy with her communication level, and does not seem to think that social media has impacted her as much as other people her age.

Participant 6

Name: **Samuel**

Age: **20**

Gender: **Male**

Time of interview: **4:55 pm**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

They feel around 6.5/10. They think they could improve because sometimes face to face conversation can be annoying.

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Yes because on social media it is so much easier to avoid unnecessary conversations and likes that aspect of it.

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

It is often hard to decide what to talk about when meeting new people in unfamiliar settings.

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Yes, if the conversation is one they don't care to have or don't want to be in-person for.

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

A little bit, they wish they had stronger communication skills in person but social media is so easy that they rely on it.

- What type of activities or support do you think would help improve your in-person communication skills?

Activities where I have common interests with people and know that they are similar to me.
That makes it easy for conversation.

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

School projects and assignments that require having to talk to new people.

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Having assignments that require face-to-face interaction and connection.

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it would help when looking for jobs in the future and in interviews.

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

They should try to start more conversations in the real world, people often don't mind a new conversation if it is interesting and not boring small talk.

- What is your preferred method of communication?

Texting.

- How confident do you feel when communicating?

Decently confident, but could definitely be much better.

Emotions (perceived)

- They seem aware that their communication in-person could be better, but think that they are still competent enough to succeed in communication.

Participant 7

Name: **Abel**

Age: **19**

Gender: **Male**

Time of interview: **5:08 pm**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

He rates himself a 6 out of 10. He knows he could do better, but thinks that he can talk to people his age well.

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Yes, it affects his ability to talk to older people because his algorithm is mainly from people his age.

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

Talking to people that are not similar to him.

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Yes, if possible. But it is doable for conversations that are necessary to be in person.

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

Not really lonely, but sometimes disconnected to people when he is physically in a room with other people but everyone is on their phones.

- What type of activities or support do you think would help improve your in-person communication skills?

Being forced to discuss with people that are not similar to him would help him increase his variability in confidence.

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Talking to peers about common interests has helped him learn to talk to friends and similar people.

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Use less technology and require more real interaction.

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it would help increase his social life by knowing and being able to talk to a wide variety of new people.

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Try to use social media less and less. and meet new people when possible.

- What is your preferred method of communication?

Texting or social media.

- How confident do you feel when communicating?

Confident with peers, but a little shy with new people and unfamiliar with other age groups.

Emotions (perceived)

- He seemed comfortable talking to me, but he seems like he knows he should improve in talking to a bigger variety of people.

Participant 8

Name: **Sabrina**

Age: **20**

Gender: **Female**

Time of interview: **5:13 pm**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

7/10. She thinks she is pretty good at talking to people compared to her friends and people her age.

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Definitely. Although she is aware of the negative effects, she still uses social media as her best way to communicate with people.

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

When she is in a situation that she is not comfortable with, she doesn't like being outgoing and talking to people. Prefers to stick to herself.

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

She wouldn't like to admit it, but probably yes.

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

Sometimes she feels lonely, but it hasn't been recently and was more during covid.

- What type of activities or support do you think would help improve your in-person communication skills?

Getting out of her shell and getting comfortable talking to new people.

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Her mother is a good communicator, so she thinks that that was a good example for her.

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

We should have more face-to-face interactions with each other and less screen time.

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

It would help everywhere, but especially with social life and career.

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

It is really not that scary, people should talk to more people. But she herself is a hypocrite for this opinion.

- What is your preferred method of communication?

Any social media that she is connected with friends on.

Emotions (perceived)

- She thinks she is a good communicator, but there is lots of room to improve. She does not feel alone in this struggle and thinks she is fine because everyone else experiences the same thing.

Participant 9

Name: **Pau**

Age: **21**

Gender: **Male**

Time of interview: **4:53**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

7, comfortable when talking about things of passion, sometimes feel awkward in small talk situations.

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Definitely, rely on texting and social media to communicate with friends, can't edit or carefully choose my words as easily in person

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

I struggle most with starting conversations and eye contact, feel self-conscious or anxious, conversation doesn't flow naturally sometimes

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Yes, especially for conflicts or disagreements, prefers texting because it gives more control over expression

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

After spending a lot of time online at night I feel isolated or disconnected

- What type of activities or support do you think would help improve your in-person communication skills?

More collaborative projects, or speaking exercises where we have to interact and communicate would be helpful.

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Growing up I was quiet and spent free time watching movies, working and collaborating with others at university has helped me improve a lot recently

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Hosting student film screenings, and creative networking events, professors encourage collaborative assignments

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, improved communication skills would help me collaborate more effectively with film crews, and networking for future opportunities.

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Time each day to put phones away, attend social events without devices, rely more on face-to-face interactions

- What is your preferred method of communication?

Uses either messages or instagram

- How confident do you feel when communicating?

When online very confident but less so when face-to-face

Emotions (perceived)

- Could tell he was a little anxious even during interview
- Seemed to be on the more introverted side

Participant 10

Name: **Marta**

Age: **19**

Gender: **Female**

Time of interview: **5:05**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

About a 6, comfortable speaking with friends, gets nervous and self-conscious in larger groups or with new people

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Yes, it becomes easier to use texting rather than dealing directly with situations face-to-face, becomes less patient during real conversations.

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

Trouble starting conversations or keep it flowing, self-conscious about appearing awkward or boring

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Yes, I sometimes stay home and chat online with friends instead of going to events

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

Yes, I feel lonely or emotionally drained

- What type of activities or support do you think would help improve your in-person communication skills?

Group workshops, speaking and presentation practice sessions

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Always been quiet, wasn't encouraged much at school to speak up publicly which has affected confidence

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Art showcases, interactive workshops, comfortable social spaces

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, express ideas more clearly in class, network better for future career opportunities, and help form deeper friendships

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Setting boundaries for daily use, attend more social gatherings

- What is your preferred method of communication?

Texting or messaging through social media

- How confident do you feel when communicating?

Decently confident, but still cautious and anxious.

Emotions (perceived)

- Nervousness in unfamiliar interactions
- Wanted deeper personal connections

Participant 11

Name: **Marina**

Age: **21**

Gender: **Female**

Time of interview: **5:24**

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

8, I like talking to people

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Yes, it makes me want to use my phone to communicate instead of in person

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

Not many, mostly just knowing what to talk about if they have different interests

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Not often, sometimes when tired or lazy

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

When using tik tok at night it can be draining and make her sad

- What type of activities or support do you think would help improve your in-person communication skills?

Having debates or group discussions where people can learn techniques

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Growing up had a lot of friends and enjoyed talking to lots of random people

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Having events where people can practice one on one conversations

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it will help for job interviews and networking

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Try going a few days without social media, she did it and felt stress free

- What is your preferred method of communication?

Texting with friends or hanging out and talking

- How confident do you feel when communicating?

She feels very confident except for some high-stress situations

Emotions (perceived)

- Enjoyed meeting and talking to others
- Very open and strong communicator even if there was a language barrier

Participant 12

Name: Angie

Age: 20

Gender: Female

Time of interview: 5:42

Questions/Answers:

- On a scale of 1-10, how confident do you feel about your ability to engage comfortably in face-to-face conversations? Explain your rating briefly.

7, can do it comfortably but doesn't always want to

- Do you think frequent use of social media and technology affects your ability to communicate effectively with others in person? Why or why not?

Yes, it makes me want to use social media more instead of calling or talking in person

- What specific challenges or discomforts do you experience when interacting face-to-face, especially when meeting new people or in unfamiliar settings?

Changing subjects if conversation stalls, talking to older people with higher ranking

- Do you tend to intentionally avoid in-person interactions by using technology or social media instead?

Depends on the day and her mood but has done it

- Do you feel lonely or disconnected due to overreliance on digital communication (texts, social media, etc.)? Provide an example if so.

Sometimes feels like she's missing out on the reality of her friends lives if she hasn't seen them in a while

- What type of activities or support do you think would help improve your in-person communication skills?

Workshops or group sessions going over tips and how to use them in conversations

- What experiences or factors in your life have most strongly shaped your current level of confidence in communicating face-to-face (family, schooling, peer experiences)?

Growing up she moved schools and had to make all new friends, taught her that it can be hard especially since she is quieter

- In your opinion, how can your university create a campus environment that encourages and strengthens meaningful, face-to-face interactions among students?

Hosting displays or meetings where people can show off their work and receive feedback from others

- Do you believe that improved interpersonal skills would positively impact your academic performance, career opportunities, or social life? Please elaborate.

Yes, it would help me make more friends and with future jobs

- What is one piece of advice or strategy you would give to peers who feel overly dependent on social media and technology for social interactions?

Try to introduce yourself to others even if it feels awkward

- What is your preferred method of communication?

Texting and calling

- How confident do you feel when communicating?

Somewhat confident

Emotions (perceived)

- She used to be very shy but grew to become more sociable
- Felt overall positive about making conversation

4. POV (Point of View) from all interviews (12)

Participant 1:

- We met with Nuria BAU student
- We were surprised to notice that she is open for communication in 3 different languages
- We wonder if it means most students are able to communicate in different languages and situations
- It would be game changing to improve Nuria's ability to communicate with more confidence in all languages.

Participant 2:

- We met with Mateo student from BAU
- We were surprised to notice that Mateo has a strong communication skills
- We wonder if this means he's had previous experience that built his confidence, such as being part of a team.
- It would be game changing if Mateo learn how to be more confident for first impression

Participant 3:

- We met with Andre, a design student who values clear and intentional communication.
- We were surprised to notice how confident Andre is when talking about face-to-face interactions, especially his emphasis on techniques like "*oei to oei*" (eye-to-eye connection).
- We wonder if it means that his regular exposure to real-world design work has helped him develop a more practiced and thoughtful communication style.
- It would be game changing to see Andre mentor or support students who struggle with face-to-face communication by sharing the strategies he uses in his work and daily life.

Participant 4:

- We met with Meilin, a student who described herself as shy and reserved in social settings.
- We were surprised to notice how self-aware she is about her communication challenges and her willingness to find ways to improve.
- We wonder if it means that Meilin is ready to take small steps toward face-to-face interaction, especially if supported by safe and inclusive environments.
- It would be game changing to provide Meilin with structured, low-pressure opportunities like guided group activities or peer-led events to help her gradually build confidence and comfort in social settings.

Participant 5:

- We met Carla from BAU.
- We were surprised to notice that she feels very confident about her ability to communicate with others, but sees it as a unique trait in her generation.
- We wonder if it means that most students her age are not confident with their ability to communicate in-person with others.
- It would be game changing to find a way for people Carla's age to improve their communication skills and reach her level of confidence.

Participant 6:

- We met Samuel from BAU.
- We were surprised to notice that he realizes he should start more real-world conversations with people, but doesn't.
- We wonder if it means he wishes he had more confidence or ability to talk to new people.
- It would be game changing to find a way for Samuel to reach higher confidence in meeting new people and starting conversations.

Participant 7:

- We met Abel from BAU.
- We were surprised to notice that he feels that he does not have the best communication skills when talking to people outside his age range and peers.
- We wonder if it means that he is afraid of talking to these people, or why he does not venture outside of his peer group.
- It would be game changing to find a way for Abel to be able to meet people outside of his age range in a comfortable environment.

Participant 8:

- We met Sabrina from BAU.
- We were surprised to notice that she believes her mother was a good communicator and that's where she gets good communication skills from.
- We wonder if it means that being with familiar people or having a reference for someone who is outgoing helps people become more confident with communication.
- It would be game changing to find a way for people to understand what good communication looks like, and how they can use that in their day-to-day life.

Participant 9:

- We met Pau
- We were surprised to notice that despite comfort online, he has anxiety and discomfort during face-to-face conversations, especially in unfamiliar settings or during conflicts.
- We wonder if it means reliance on digital communication might impact young adults in-person social dynamics. Also leading to harming their personal, academic, and professional relationships.
- It would be game changing to introduce structured collaborative events to practice face-to-face communication comfortably and confidently.

Participant 10:

- We met Marta
- We were surprised to notice she often avoids in-person events by staying home to use technology instead.
- We wonder if it means that early life experiences combined with reliance on social media, may cause young adults to feel less able to engage meaningfully face-to-face.
- It would be game changing to find a way for face-to-face interaction to be practiced online.

Participant 11:

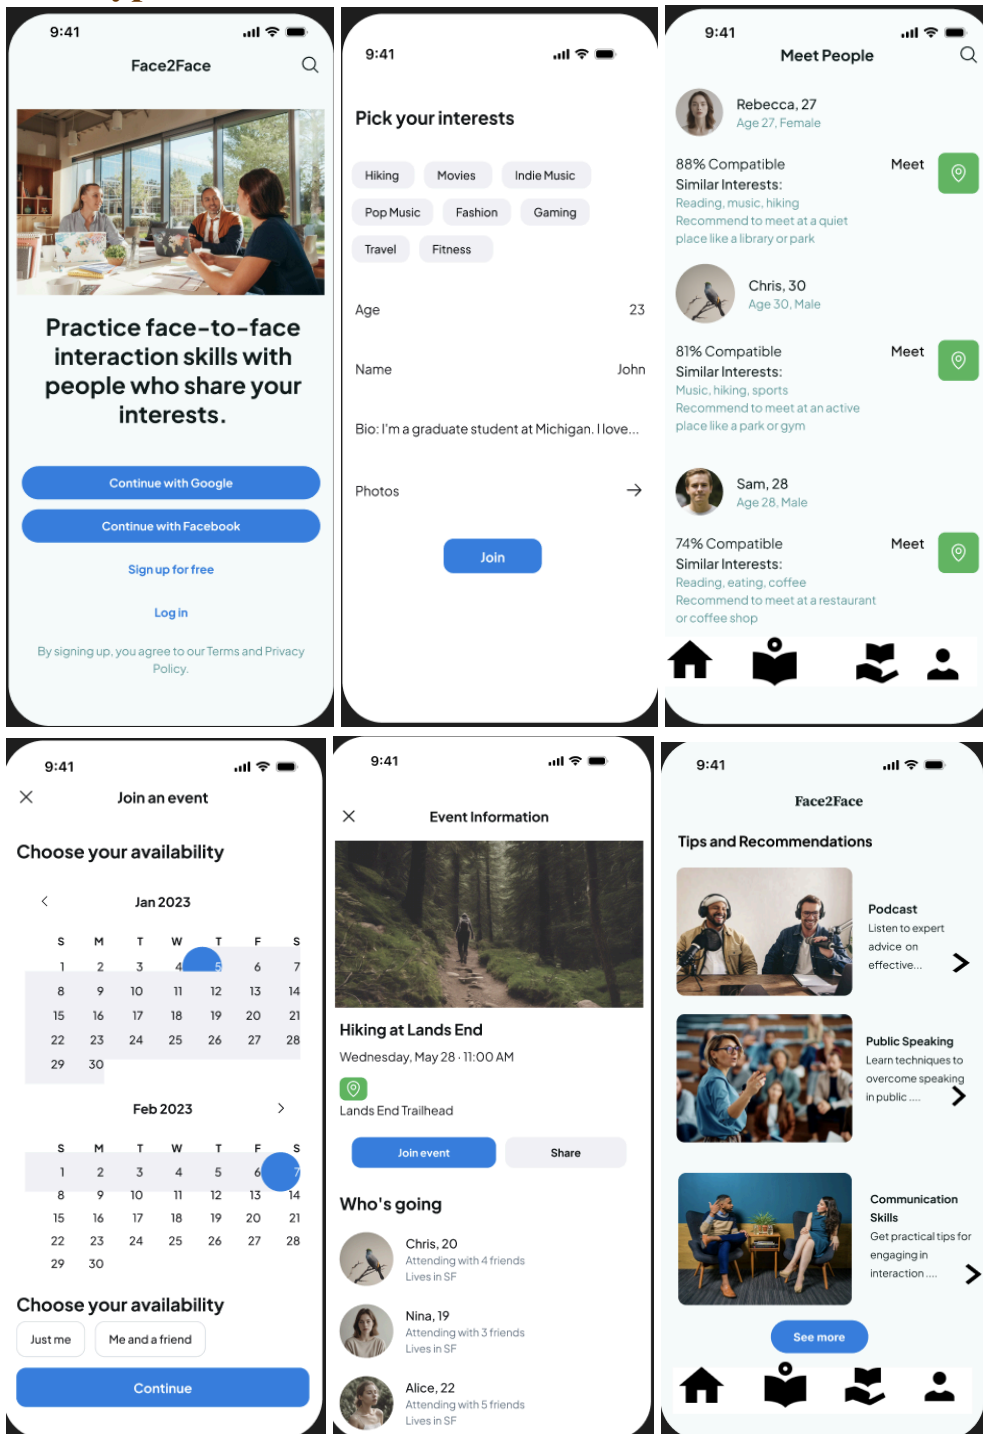

- We met Marina
- We were surprised to notice that despite her confidence, Marina still defaults to phone communication, especially when tired or lazy.
- We wonder if it means that even socially confident individuals are affected by online habits that reduce motivation for in-person interaction.
- It would be game changing to use this field of technology to not take away from in-person communication but to strengthen it

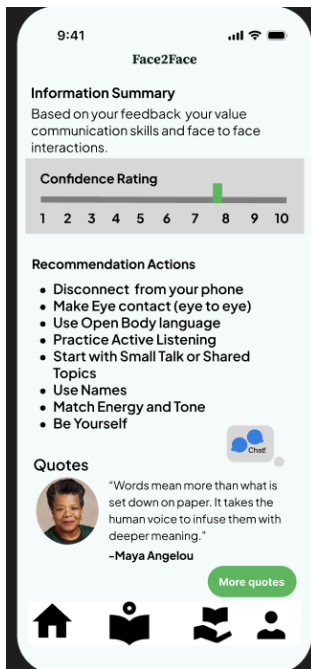

Participant 12:

- We met Angie
- We were surprised to notice Angie avoids in-person interactions depending on her mood.
- We wonder if it means mood and situational factors play a role in willingness to engage face-to-face.
- It would be game changing to make a way that one who isn't in the mood to interact with others can still have meaningful conversations.

5. Build your prototype

Prototype 1 Pictures:

6. Show your prototype to the same people you interviewed before and receive feedback

Feedback 1:

Name: Africa

Picture:

Feedback: She thinks that is a good idea when you are in a new city and wants to meet new people, social ability, speaking to others people help you to socialize, learning options is interesting, Good concept as Barcelona where people like to meet.

Feedback 2:

Name: Nuria

Picture:

Feedback: Interesting, good way to connect with people and interact, more space for recommendation(video like tiktok), more color and tractive and dynamic, and like the App

Feedback 3:**Name:** Lena**Feedback:** Level measurement for improvement such as activity and more options, write reviews,**Feedback 4:****Name:** Paula**Feedback:** Like the App, Rating can be an option to adapt to the level of confidence, easy for extroverted people, Number of people in the activity to help shy people to join.**Feedback 5:****Name:** Xenia**Feedback:** For the podcast, give more ideas for shy people, direct message for friends to convince them about safety, contact**Picture with 3, 4, and 5:****Feedback 6:****Name:** Al**Picture:****Feedback:** It would be cool to match with people who share interests that aren't only your own. This should be an option though, but it is a cool idea and he would use it.

Feedback 7:

 Name: **Ion**

Picture:

Feedback: It is a very interesting idea, make sure it is safe as well as maybe add a direct message button for people to chat beforehand. Overall it is a cool app but it would be hard to hear about it.

Feedback 8:

 Name: **Inoa**

Picture:

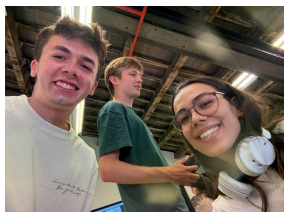

Feedback: "Can people add their own events" was a question. This will be interesting because it risks safety a little bit but could add more customization and uniqueness to ideas.

Feedback 9:

 Name: **Edena**

Picture:

Feedback: There should be a way to view multiple potential events or decline an event if it is one that you aren't interested in. Just in case people don't want to do a particular event with new people or aren't comfortable in certain spaces with unfamiliar people.

Feedback 10:

Name: **Noelia**

Picture:

Feedback: Cool idea, she would be more likely to use it if there was a way to do a virtual meeting like a zoom before meeting in person.

Feedback 11:

Name: **Estelle**

Picture:

Feedback: She thought it was a great idea, she isn't the most outspoken so if there was a way to specify personality traits too it would be beneficial.

Feedback 12:

Name: **Anna**

Picture:

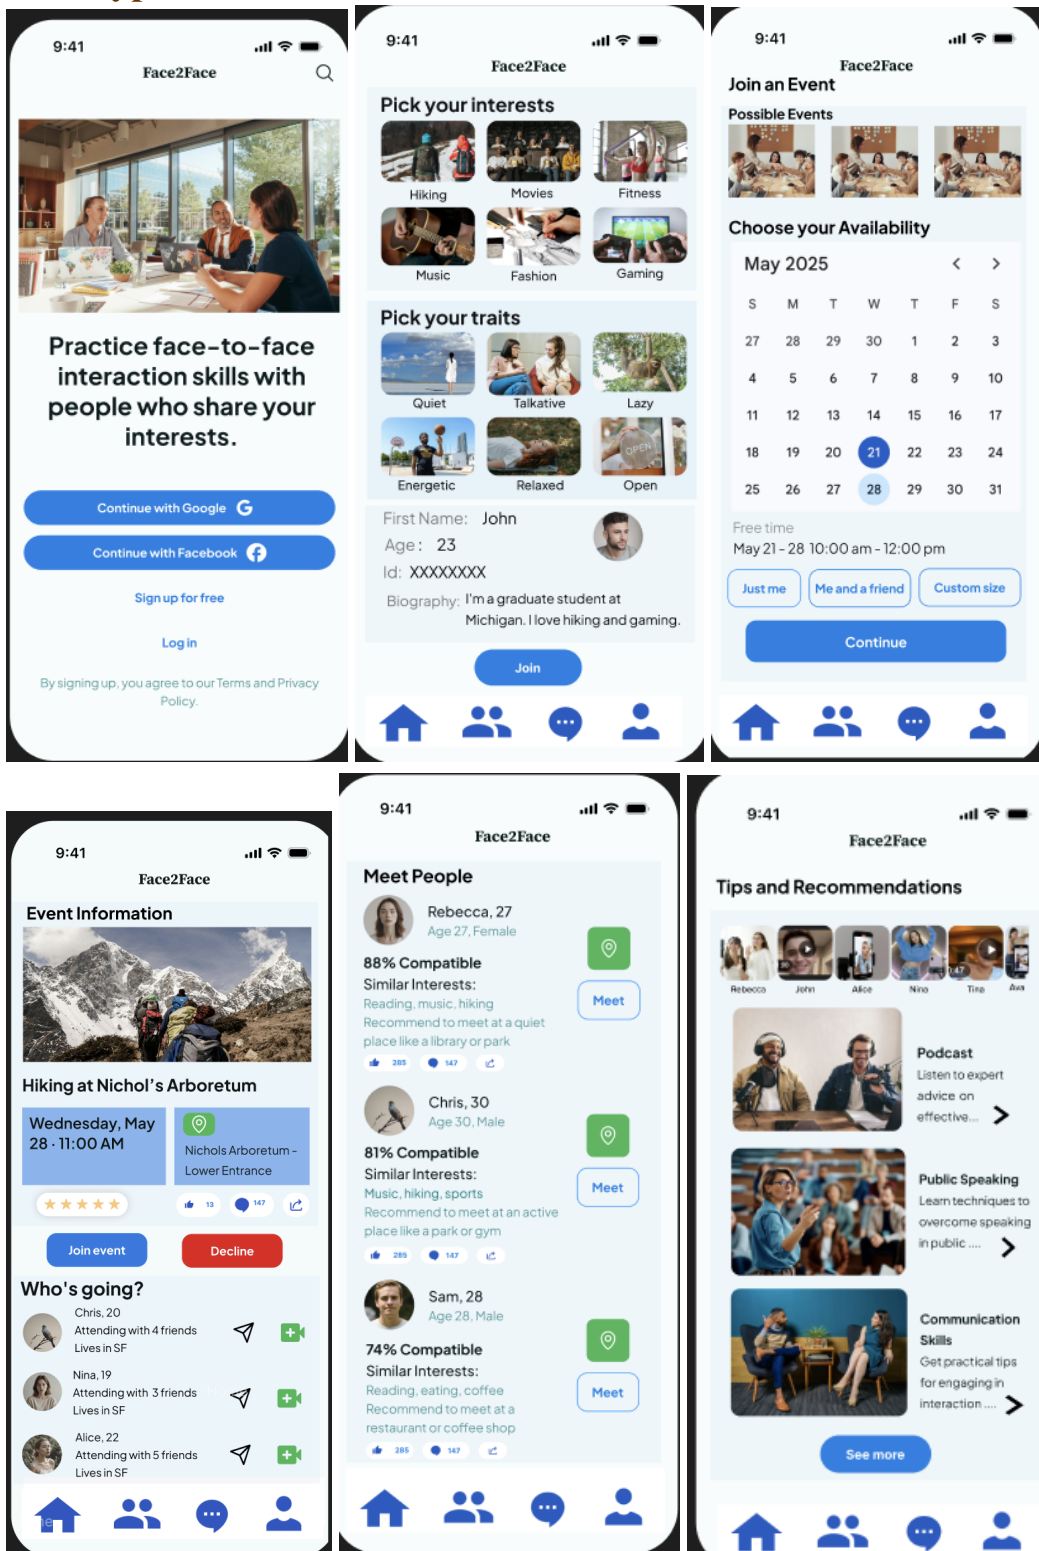

Feedback: You should be able to create as large or small of a group size as you want so there can be large gatherings with people of shared interests.

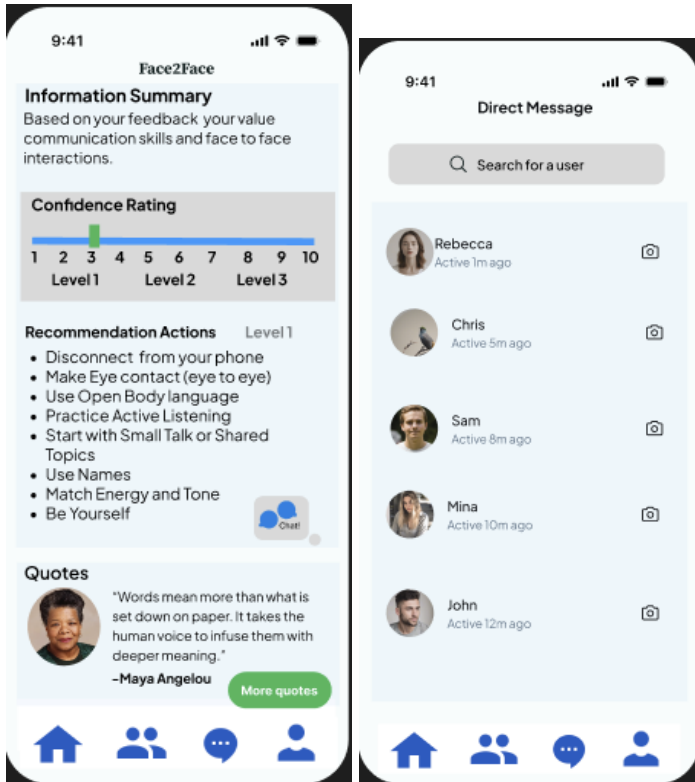

Feedback 13:**Name:** Paula**Picture:**

Feedback: You should have a spot to search for events if you already know that there is one happening and you'd like to go.

7. ReBuild your prototype according to the feedback received.

Prototype 2 Pictures:

8. Show your prototype to 5 more people and receive feedback

Feedback 13:

Name: **Mariona**

Picture:

Feedback: Likes the App, limited message for the direct message, Suggest to add a map, add a search button in the Meet, for Id could use phone number or Id.

Feedback 14:

Name: **Yena**

Picture:

Feedback: Maybe add an option for only girls or only guys to go? Both for safety and preference.

Feedback 15:

Name: **Joma**

Picture:

Feedback: She doesn't really have any feedback, she thinks the app looks cool and the design is simple but fun with the pictures and options.

Feedback 16:

Name: **Gabriela**

Picture:

Feedback: Have a way where if you liked an event you can have more similar ones recommended and vice versa if you don't like one.

Feedback 17:

Name: **Julia**

Picture:

Feedback: She suggested that we also add videos to the tips and recommendations page so that people can actually see how to implement them.

9. Build your final prototype according to the feedback received.

Prototype 3 Pictures:
